

# ORDERING MICE FOR FOAM CELLS

**LIPID MAPS Procedure Protocol PP0000002900**  
**Version 1, 07-24-2006**

## **MATERIALS**

LIPID MAPS Protocol for Use of Animals (Protocol PP0000001100)  
Approved Animal Use Protocol Number (from your institution)  
LIPID MAPS Protocol for Harvesting Foam Cells (Protocol PP0000003100)

## **PROCEDURE**

1. Review the protocol for Harvesting Foam Cells (Protocol PP0000003100) to determine number of mice needed. Order one extra per condition in case of mouse death.
2. Place an order of 3-5 week old MALE mice (B6.129S7-Ldlrtm1Her/J), stock number: 002207, from Jackson Laboratory. Price per mouse: \$65.60 at 3-5 weeks of age. Males are on a waiting list of 3-4 weeks in addition to the age needed (5 week old: allow 8-9 weeks before delivery).
3. Mice should be acclimated for 2 weeks before placing them on the high cholesterol diet.
